

Brad Kent

AV / IT Project Engineer / Manager

With over twenty years of experience in both IT and AV, I've had the privilege of working with many of the world's leading tech companies. My attitude and career has always been a hands-on, solutions-driven approach, whether it's managing and maintaining complex infrastructure, designing and delivering seamless audiovisual setups, or bridging the gap between technical and creative teams. I always remain calm, stress free and bring a reliable, sociable presence to any environment and have a life long passion for any and all things tech.

Experience

2019-2025
Zoom Video EMEA HQ, Amsterdam
AV Project Engineer

5+ years with global admin access to every company office worldwide. Supporting, maintaining, deploying, standardising, documenting and training of the AV systems across a wide range of conference rooms, meeting spaces, executive events and live broadcasts. Known for my flexibility and willingness to go above and beyond, regularly stepping outside of my remit to solve problems and support colleagues. This commitment was recognised with a global Outstanding Contribution Award.

2019
Nike EMEA HQ, Hilversum
Project Manager Digital Experience

AV system design and delivery for new corporate offices and commercial showrooms. Managing the upgrades and refit of the European Campus

2018
UBER, EMEA HQ, Amsterdam
Senior IT Field Engineer

Supporting all staff with all hardware, software and network issues. Mac, PC.
